CENTER FOR TECHNOLOGY, ESSEX

2 Educational Drive, Essex Junction, VT 05452

To Whom it May Concern:

I am writing this letter as a recommendation for Renzo Hall. I am the Computer Animation and Web Design teacher at the Center for Technology, Essex. It has been a pleasure to get to know Renzo, and I am happy to speak about his academic and technical progress in the areas of Computer Animation and Web Design.

After completing the first year CAWD program, Renzo applied and was accepted to CAWD2, the program I teach.   We do more than just the title of the course. Renzo spent the first part of the year learning photography, motion graphics, special effects, cinematography, web design and development. Renzo is a student that has strong illustration and modeling skills. The modeling comes from his deep dive in Blender, a complex program used for 3D content creation including modeling for games and animation.

CAWD is a very technical program. We use industry platforms like Adobe, Blender for modeling and animation, Unity for game development as well as ATOM and CodePen to assist with web design and development. We also practice working in groups and in production teams learning about Agile, Scrum and other project management cycles. I've observed Renzo as a strong contributor to team work and a very solid communicator.

Recently we completed a cinematography and special effects project. Renzo selected a group of like minded students. Together they produced a highly creative "short" that showcased Renzo's commitment to the group's idea. His group finished the deliverables on time. It was evident in the final project that they each had a good time and were able to demonstrate the learning targets.

Renzo is developing the skills that will enable him to be successful in the design and creative fields. I have no reservation in recommending him to college and feel that he will bring something to any community that he is a part of.

Please don't hesitate to contact me if you have any questions. (802)-881-1818.

Sincerely,

Will Bohmann
Computer Animation & Web Design Teacher
